TrimTokyo Responsive Sizing Guide

Quick reference for keeping future React/SCSS sections visually consistent across desktop, tablet, and mobile.

1. Breakpoint Standard

Breakpoint	Target	Recommended approach
Desktop	> 1100px	Use full desktop sizing and spacing.
Tablet	769–1100px	Reduce typography, gaps, card dimensions.
Mobile	481–768px	Compact typography, spacing and controls; horizontal scrolling where useful.
Small mobile	≤ 480px	Further reduce sizes and horizontal padding.

2. Page / Section Spacing

Element	Desktop	Tablet	Mobile	Small mobile
Section top padding	40–60px	32–45px	24–32px	20–28px
Section bottom padding	50–70px	40–55px	35–45px	30–38px
Between adjacent sections	25–40px	20–30px	18–25px	14–20px
Container horizontal padding	24px	18–24px	14–18px	12–14px

3. Typography Scale

Component	Desktop	Tablet	Mobile	Small mobile
Main section title	2.0–2.4rem	1.75–2.0rem	1.4–1.6rem	1.2–1.35rem
Large hero title	2.6–3.0rem	2.2–2.6rem	1.8–2.2rem	1.5–1.9rem
Card title	0.95–1.2rem	0.88–1.05rem	0.75–0.9rem	0.68–0.8rem
Body text	0.88–1.0rem	0.8–0.9rem	0.68–0.78rem	0.6–0.7rem
Small/meta text	0.75–0.85rem	0.7–0.8rem	0.62–0.7rem	0.55–0.62rem

4. Cards & Images

Pattern	Desktop	Mobile
Grid cards	3–5 columns depending on section	Horizontal scroll or 1–2 columns
Card gap	18–30px	10–14px
Card radius	16–24px	13–18px
Service/card image height	150–240px	105–140px
Horizontal reel card	≈220 × 390px	≈150–180px wide × 260–320px high
Card content padding	12–20px	9–12px

5. Buttons & Controls

Element	Desktop	Mobile
Primary button height	46–52px	40–46px

Button font	0.85–0.95rem	0.65–0.8rem
Button horizontal padding	14–22px	10–16px
Tabs	10–18px horizontal padding	7–13px horizontal padding
Icon buttons	36–44px	30–38px

6. TrimTokyo Rules to Follow

• Keep desktop styling as the primary/reference design.

• At 768px and below, reduce typography, image heights, gaps, and padding instead of simply stacking everything.

• Use horizontal scrolling for card-heavy mobile sections when five or more cards are present (for example reels and style/service selectors).

• Avoid large empty gaps between consecutive sections. Target roughly 18–25px visual separation on mobile.

• Keep mobile horizontal page padding around 14–18px; use 12px only for very small screens.

• For small screens (≤480px), reduce sizes again rather than letting desktop-sized text/cards dominate the viewport.

• Use consistent radii: approximately 16–24px desktop and 13–18px mobile.

Reference: these values are a practical consolidation of the responsive sizing pattern used across the TrimTokyo sections we worked on. They are guidelines, not strict pixel requirements.
